Exposure controls

Personal protective equipment:

General protective and hygienic measures:
- Keep away from foodstuffs, beverages and feed.
- Immediately remove all soiled and contaminated clothing.
- Wash hands before breaks and at the end of work.
- Store protective clothing separately.
- Avoid contact with the skin.
- Avoid contact with the eyes and skin.

Breathing equipment:
- In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air.

Protection of hands:
- Chemical-resistant, impervious gloves with an approved standards should be worn at all times.
- The selection of the glove material is based on the penetration times, rates of diffusion and its degradation.

Protective gloves

Material of gloves
- PVC gloves
- Neoprene gloves

Penetration time of glove material
- The protection time of the gloves can not be accurately estimated for mixtures consisting of several substances.
- Refer to and observe manufacturers break through times of the protective gloves.
